Area of Parallelograms

What is the width of a parallelogram with an area of 3,600 square yards and a length of 80 yards?

Carlos wants to stain his rectangular deck. One gallon of stain will cover about 350 square feet of surface. His deck is 16 feet long and 22 feet wide. If he has only one gallon of stain, does he have enough stain to put one coat on the deck's surface?

Area of Triangles

What is the height of a triangle with a base of 6 cm and area of 18 cm^2 ?

Samantha is painting a seaside mural. The sail on the sailboat will be 5 feet wide and 10 feet tall. If a can of spray paint covers 10 square feet, how many cans will she need?

Area of Trapezoids

If a trapezoid has an area of 90 square meters and bases of 5 and 10 meters, find the height.

Area of Composite Figures

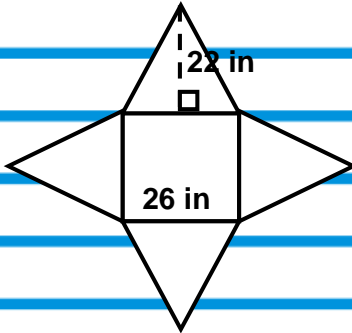

Area of Shaded Regions

Surface Area Word Problems

A cracker company wants to create a new eco-friendly design for their package which uses the least amount of cardboard. Which takes less cardboard to make: 2 boxes that are 5x8x9 inches or 1 box of 12x11x7 inches?

Casey wants to paint the surface of a wooden pyramid he built. Use the net below to calculate how many cans of paint Joseph will need to buy in order to paint his pyramid if a can covers 100 cm^2 .

Volume

Each small cube has a length, width and height of $\frac{1}{2}$ unit.

Volume & Surface Area Performance Task

A cereal company is selecting packaging for their new product Fruity Os. Both packages are rectangular prisms. They need the package to hold at least 140 in^3 of cereal, and use the least amount of packaging material. Option A is 12 in high, 6 in long, and 2.5 in wide. Option B is 8 inches high, 6 inches long, and 3 inches wide.

How much cereal will package A hold?

How much cereal will package B hold?

How much cardboard will package A use?

How much cardboard will package B require?

Which package should the company choose? Why?

Polygons in the Coordinate Plane

Plot the following points and connect them in the order given. What would be the coordinate of a fourth point that would form a parallelogram?

R (3,-2) S (3,3) T (0,5)

Plot the following points in the order given. What is the area of the shape formed?

D (-3,-1) E (-5,-5) F (-1,-5)

Area of Parallelograms

$$391 \text{ ft}^2$$

$$209 \text{ cm}^2$$

$$111 \text{ m}^2$$

What is the width of a parallelogram with an area of 3,600 square yards and a length of 80 yards?

$$45 \text{ yds}$$

Carlos wants to stain his rectangular deck. One gallon of stain will cover about 350 square feet of surface. His deck is 16 feet long and 22 feet wide. If he has only one gallon of stain, does he have enough stain to put one coat on the deck's surface?

No, he will have an area of two square feet uncovered.

Area of Triangles

1,155 ft²

170 m²

720 ft²

What is the height of a triangle with a base of 6 cm and area of 18 cm²?

6 cm

Samantha is painting a seaside mural. The sail on the sailboat will be 5 feet wide and 10 feet tall. If a can of spray paint covers 10 square feet, how many cans will she need?

3 cans

Area of Trapezoids

176 yd²

336 yd²

129.5 yd²

If a trapezoid has an area of 90 square meters and bases of 5 and 10 meters, find the height.

Surface Area Word Problems

A cracker company wants to create a new eco-friendly design for their package which uses the least amount of cardboard. Which takes less cardboard to make: 2 boxes that are 5x8x9 inches or 1 box of 12x11x7 inches?

628 in² and 586 in²

Casey wants to paint the surface of a wooden pyramid he built. Use the net below to calculate how many cans of paint Joseph will need to buy in order to paint his pyramid if a can covers 100 cm².

SA: 232 cm²

3 cans

Volume

$$11.25 \text{ cm}^3$$

$$3 \frac{5}{9} \text{ cm}^3$$

Each small cube has a length, width and height of $\frac{1}{2}$ unit.

$$3 \text{ units}^3$$

Volume & Surface Area Performance Task

A cereal company is selecting packaging for their new product Fruity Os. Both packages are rectangular prisms. They need the package to hold at least 140 in^3 of cereal, and use the least amount of packaging material. Option A is 12 in high, 6 in long, and 2.5 in wide. Option B is 8 inches high, 6 inches long, and 3 inches wide.

How much cereal will package A hold? 180 in^3

How much cereal will package B hold? 144 in^3

How much cardboard will package A require? 234 in^2

How much cardboard will package B require? 180 in^2

Which package should the company choose? Why?

The company should choose package B. Both packages hold all of the cereal, but package B uses less cardboard.

Polygons in the Coordinate Plane

Plot the following points and connect them in the order given. What would be the coordinate of a fourth point that would form a parallelogram?

$(3, -2)$ S $(3, 3)$ T $(0, 5)$

$(0, 0)$

Plot the following points in the order given. What is the area of the shape formed?

D $(-3, -1)$ E $(-5, -5)$ F $(-1, -5)$

8 units²
